

Amna was diagnosed with Thalassemia Major at 3 months of age and thus has been receiving all of the medical care from PWA ,at

a very young age. She receives primary schooling from KMA Girls Primary School and is well-loved by her peers and teachers alike. Being an only child, her parents treat her well and are therefore worried about her future. While chatting with us she was very lively and chatty. Her love for chocolates, nihari and Indian comedy shows was greatly emphasised. The child's vibrancy and happy disposition had enraptured many staff members and department volunteers. It is unfortunate that this hereditary condition unable her to participate in strenuous activities ,yet Amna never once complained against it.

Her parents belong in the memon community. They are from a simple household with her father earning a meagre income as a Private company employee. Concerning the multitude of services provided to her daughter he is content with the organisation and genuinely thanks the responsible committee for initiating this charitable work.

We wish all the interested sponsors to join hands with us in this endeavour and support our community in any way possible. “

**"YES! YOU CAN LIVE A MEANINGFUL LIFE TOO BY LITTLE GESTURES THAT MEAN A LOT TO OTHERS"**

**We have attached the profile of AMNA for your convenience**

Amna is one of the many kids who are under the care of PWA. The average expense on **AMNA's** transfusions and medicines at PWA is around **Rs. 256,000/-**. We need YOUR support in this cause. Sponsor as many as you desire. Looking forward to your positive response. Thank you.
